Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-14, 74 and 76 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a NEW MATTER rejection.

A method comprising providing an output indicating a weighted vote for a known class, as recited in amended claim 9, is new matter.

The original claims did not recite any output. The originally filed specification provides ample support for output or display of a sample classification. In the response filed 8/4/06, applicant points to paragraph numbers for support, but is reminded that the originally filed specification does not indicate paragraph numbers. However, support for the newly recited limitations of claims 1, 73, and 75 is found on page 7, lines 8-9, page 8, lines 7-9, page 9, lines 2-3, and page 35, lines 12-14. All these pages disclose outputting classification of a sample; none discloses outputting a weighted vote. None of the original figures shows an output or graphical display of a weighted vote for a known class. As the originally filed disclosure does not provide support for output of a weighted vote, the claims recite new matter and are rejected.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or fairly disclose using weighted votes to classify samples into one of the cancer disease classes recited in instant claim 1.

Conclusion

Claims 9-14, 74 and 76 are rejected; claims 1-7, 65, 66, 72, 73 and 75 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
